### 1. Introduction

The FCL.740 (b) *“Renewal. If a class or type rating has expired,...”* has been revised in the regulation EU 2018/1119 (refer to point 14 of Annex I)

The regulation allows, under specific conditions, a DTO or an individual instructor to provide also a refresher training.

As the former AMC1 FCL.740(b)(1) was perceived as too restrictive, the AMC has been revised in the Annex II to ED Decision 2018/009/R to provide more flexibility when determining the amount of refresher training needed by an individual applicant.

Consequently, the INFO/LIC/EN/2016-004 is cancelled and the form to assess the needs of the applicant and to certify the received training has been modified.

### 2. Guidance

The Belgian Civil Aviation Authority (BCAA) provides a form (Doc: Certification of refresher training for renewal of class or type rating (ref. LA/LTRA/0501D59) to support the assessment of the needs by the applicant, the development of the individual training programme and the certification of the successful completion of the training. The form is available on her website.

After successful completion of the training, the ATO, the DTO or the individual instructor, as applicable, should issue the applicant with this document demonstrating the assessment, the training received and a statement that the training has been successfully completed.

The training completion certificate and should be presented to the examiner prior to the proficiency check.

Following the successful renewal of the rating, the document and the examiner report form should be submitted to the BCAA.
