2. Introduction

CrewCert is an application developed by the Belgian Federal Public Service Mobility and Transport for **issuing and managing electronic certificates** for **seafarers** employed on board of **ships flying the Belgian flag**.

Usage of electronic certificates on board ships has been approved by the International Maritime Organisation (IMO) since 20 April 2016 in FAL.5/Circ.39/Rev.2.

Digitally signed electronic documents are becoming easier, more secure and more common in all industries, shipping included. Ship owners and managers, as well as flag state and port state authorities, recognised organisations (RO), vetting agencies and many other companies will benefit from a paperless class and statutory regime.

The certificates issued by the **Certification Seafarers Antwerp (STCW) department** will be managed via CrewCert. It is our objective to issue the **navigation licenses**, the **certificates of proficiencies** and **recognitions** electronically for **seafarers employed on the Belgian flagged vessels**.

The personal certificates which are not issued by the CSA (STCW) department can voluntarily be upload in a document folder.

3. Seafarer Consent / Mandate

Every individual **seafarer** is **owner** of his or her **personal certificates**. For professional purposes a seafarer can grant access to other stakeholders such as a Shipping Company and the associated Manning Agencies. Furthermore, the individual seafarer can authorize the Shipping Company to provide his/her personal certification on board. For this, the individual seafarer must give a formal **“consent”** or **“mandate”** to a **Shipping Company** and **the associated Manning Agencies**.

Only when this consent has been given by the individual seafarer, the relevant Shipping Company and/or Manning Agent can have the necessary rights in the CrewCert application. The consent is a formal document that contains the rights under the EU GDPR legislation and the applicable disclaimers, as well as the assignment of the rights of use for stakeholders involved.

2. Validate certificates

The up-to-date crew certificates can only be retrieved by a registered CrewCert user (e.g. BMI, an employee of the shipping company or Manning Agent, the Master of the vessel, the seafarer itself). However, to validate an electronic STCW certificate issued by BMI, it is not required to be a registered user in CrewCert. This allows third parties (e.g. PSC officers, vetting inspectors, local port authorities,...) to check the validity and authenticity of the certificate.

Checking the validity and authenticity of a certificate can be done in 4 different ways, but you always need to have either a hard copy or a soft copy of the certificate at hand:

1. Go to the CrewCert homepage (<https://crew.apps.mobiliteit.fgov.be/>). Enter the certificate number the seafarer registration number and the expiry date of the certificate on bottom side of the screen under “Certificate verification”. These data are mentioned on the electronic certificate.
2. Scan the QR-code at the bottom of the electronic certificate with a mobile device.
3. Click on the QR-code at the bottom of the electronic certificate.
4. Click on the link to the CrewCert homepage in the text next to the electronic signature at the bottom of the electronic signature.
