Narrative:

The helicopter was highjacked in order to facilitate the escape of a convict held in the penitentiary center of Ittre.

The helicopter landed on the central courtyard of the penitentiary, where the concerned convict jumped on the skids. Other convicts tried to get on board as well. When trying to take-off, the helicopter lost balance, and fell on the right side. With 2 people on the skids, the helicopter is exceeding the Max Load of 245 kg.

REF: AAIU (Belgium) 2007-17.

Cause of the accident

External, uncontrolled action of persons having put the helicopter off-balance.

Safety Recommendations

None, considering the particular aspect of this event.
