

Change of address

Natural person

Any change of address must be recorded by the municipal administration of your new place of residence.

The change of address must no longer be entered in the registration certificate. The registration certificate will only mention the appropriate address at the time of issue.

The holder of a Belgian registration plate who moves abroad and who is no longer recorded in the population register of a Belgian municipality is required to send his/her registration plate back to the vehicle registration service (DIV) within 15 days.

Legal entity

A company that changes its address should have this recorded in the Central Enterprise Databank (BCE/KBO). It is based on this change in the BCE/KBO that the address of the company is automatically changed in the database of the DIV.

Re-registration is no longer necessary.
